Notes of Inspection made on the Mysore Town.

I inspected the Mysore City improvements on the 11th inst: in company with Rao Bahadur Rao and the Deputy Commissioner. The removal of the Holeyars from their present abode in Chamaraj Mohalla is very desirable and the place may be set apart for the occupation of the Palace servants. The elevated ground to the south of the Waveri Lines may be utilized for the Pariahs.

The Eedga extension appears to have been laid out on proper sanitary lines. The houses under construction, about 15 in number, have made good progress, but the drains appear to be somewhat deep and narrow, and care should be taken that the sections are proper. While the houses are building, it is necessary to find servants a[illegible]

Ir. 3692-3 2/3/04.
L2108-1903

for them. Otherwise time will be lost and there is no object gained in keeping the houses vacant after they are completed. Timely occupation of the new houses is likely to serve to relieve early the congestion in the old City. The site required by the Wesleyan Mission for the women's Hospital may be given free.

I believe Mrs. Lowe returned to Nyasaland on the 4th inst.

On the 13th visited the Palace. The work seems to be progressing slowly. The ceiling of Ambaville requires to be pushed on; and, it is a pity that the Hall will not be ready for any of the State functions this year.

state of the finances, it seems Highly

Bangalore City Inspection

Notes.

&&&&&&&&&&&&&&&&&&&&&&&&&.

During my inspection of the City on Saturday morning the 19th instant, with Mr. Sparkes, Deputy Commissioner and President of the Municipality, I saw some of the conser-vancy lanes and the so-called drains of Chamarajpet in a most deplorable condition for want of a proper drainage scheme. I am afraid that if things are allowed to remain as they are for sometime longer, the Extension which was the 1st of its kind opened during the administration of His late Highness Chamarajendra Wodeyar Bhadur in the interests of the entire population of the City, will lose its reputation as being one of the ~~most~~ healthiest adjuncts of the City. Though it may not be possible to carry out any extensive or costly drainage scheme in the present state of the finances, it seems highly

desirable that the sewage water should at once be drained off so that it may not contaminate the soil and render it as unhealthy as some of the interior parts of the City.

2. The President will accordingly be requested to take early steps in communication with the Chief Engineer to arrange for the preparation of a Scheme, if one has not already been prepared, for the satisfactory completion of the main and other drains in the said Extension.

3 A sum of Rs30,000/- may perhaps be alloted for the purpose during the current year out of the Rs50,000 provided in the Civil Budget for the improvement of the City. ~~The work will of course be undertaken by the P.W. Department under the orders of the Chief Engineer.~~

4 I then saw the Temple newly constructed in the Extension not as yet been completed. On my way I noticed wild growth

No 3046 9/7/04
L.766-03 9/7/04
I would invite the earnest attention of Deputy Secretary the completion of [illegible] building—

Lantana both on private and municipal lands and a number of pools in front and by the side of Mr. Chokkalinga Modaliar's houses on the 5th Main Road where water stagnates for months toge-ther and there is so much of rank vegetation on both sides of the so-called main drain which carries the water to the Kempambudi Tank through the old Nalla enclosed in Mr. Chokka-linga Modaliar's garden that I was not surprised that the complaints that I heard now and then about Malaria pre-vailing in the locality, were well founded. The President should, at once take steps in the interests of public health, to arrange for filling up the pools and for the removal of the rank vegetation in the vicinity. He will of course consult the Senior Surgeon and Sanitary Commissioner in the matter and arrange to carry out any other improvements that may be suggested by him.

I was then asked by M. Sali-gram Subba Rao, Madras Rank Soobhiah

and Sowcar Padmanabhiah to see why the owners of houses by the side of the new road opened to the west of the Fort to connect the 5th Main Road Chamarajpet should not be given the vacant land (including the old road) up to the margin of the road in order that they might enclose it by a wall and keep it as an open ground. I informed them that this was a matter for consideration after the filling up of the Fort trench and the complete levelling of the ground on the eastern side of the road

6 Next, the land applied for by Mr. Chendrasekharam Iyer and other residents of Chamarajpet for the purpose of a Reading Room and recreation ground was shown to me and some of the residents who were with me said that this was the site originally intended for the Municipal School. It appeared to me that this being only a small triangular piece of ground measuring about 2 acres was not quite

suited for a school to which of course an extensive play ground &c, should be an appendage. I think the land which is in a central position between Chamarajpet and the Basavangude Extension may well be alloted for the purpose for which it has been applied for. The question of building the Municipal School to the north of the 5th Main Road in front of this site may be reserved for consideration when funds permit.

provides a pedestrian subway is constructed

7 I then got up the Rampart and among other things saw a number of convicts levelling the ground on the eastern side of the Fort and filling up the trench. It appears to me that the convict labour may be more usefully employed in filling up the trench and levelling the ground to the North, South and West of the Fort, the Eastern portion being taken up thereafter.

8 It is a pity that no progress has been made in the matter of constructing the school by Doddanna to whom the site was alloted by the side of the

north fort gate about 2 years ago. The Health Officer said that the plan of the building was approved by the Board only the other day. I cannot understand why there has been so much delay in the matter. I hope good and speady progress will be insisted upon and the charitable work brought to a completion as early as possible.

9. While here, I noticed the beautiful ground in front of the Victoria Hospital being converted into a cart or jutka stand. This is highly objection-able. The ground must be properly levelled and made into a nice flower garden regard being had to the accommodation required for holding the market show every year. The cart and jutka stand may conveniently be located to the east of the ground alloted to the school proposed to be built by Doddanna.
